

pets	
lists each pet's information along with attributes of that pet	
 pet_id	serial
name	varchar(255)
location	varchar(255)
weight	smallint(255)
personality	varchar(255)
species	varchar(255)
breed	varchar(255)

The purpose of this databases is to enable pets to adopt owners that are the best match for them.

MVP includes tables to allow owners to enter preferences for size, species, and personality.

Also allows pet admins to set up vaccine information for each pet for it to be displayed, along with personality, species and breed.

owner_preferences	
stores multiple preferences for potential owners	
 owner_preference_id	serial
owner_id	int
weight_pref	smallint(255)
species_pref	varchar(255)
personality_pref	varchar(255)

vaccine_dates	
lists all the dates of each vaccine that each pet has received	
 vaccine_received_id	serial
pet_id	int
vaccine_name	varchar(255)
vaccine_date	varchar(255)

owners	
provides unique information about each potential owner. Note this tale does not track any adoptions or potential adoptions.	
 owner_id	serial
name	varchar(255)
location	varchar(255)
house_size	varchar(255)
child_count	smallint(255)
yard	boolean(255)
